Dr. Karl Anderson DDS, MS, NMD, IBDM, DICOI

Dr. Anderson holds a Dental and Masters of Science degree from the University of Minnesota Dental school. He received training at UCLA in the early eighties in Branemark surgical training course, and he is a graduate of the Misch Institute. His specialty degree is in the field of periodontics. Dr. Anderson has placed and restored dental implants since 1985. He has been involved in the development of several implant products. He holds and is a Diplomat of the International Congress of Oral Implantology, the largest global implant organization. Dr. Anderson also is a Board Certified Doctor of Integrative Biologic Dental Medicine.

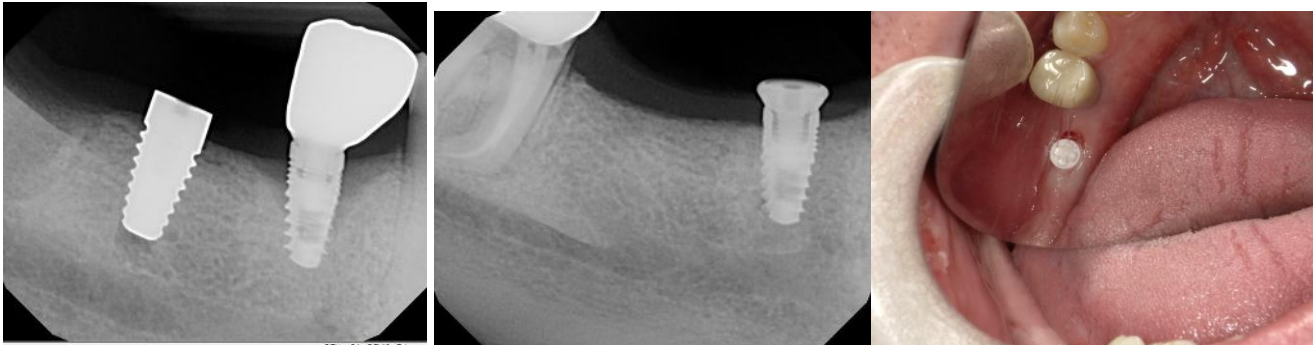

He is a Naturopathic Medical Doctor and uniquely educated and versed in abilities to safely remove toxins from the Oral environment. He understands the correlation between dental toxins and chronic disease.

Doctor Anderson is Smart certified (safe mercury removal) and a longtime member of the IAOMT, and has lectured as guest faculty of his alma mater, the American College of Integrative Biologic Dental Medicine.

He is also a founding member the North American Academy of Neural Therapy. He is also an active member and has lectured for the Minnesota Holistic Medical Group

Site #30 C-h height, D2/D1 bone

Due to crestal bone loss on recently placed, one-year titanium, we convinced patient to let us place the new XT, although it is short implant with the XT screw design and very dense bone, we thought it best to place this material, watching #29 closely, might need to replace with Zirconia in future.
