

Patient Testimony: The Cosmetic Implant

The Zeramex®XT 3.5 diameter displays superior aesthetics because of its white color and small size.

New Smile revealed to patient for the first time - The Cosmetic Implant

The Patient's Story

Ms. Leigh Scarber is a Trail runner, Ultra Runner, Physical Therapist and the owner of Ascent Wellness, Ventura. Can you see her beautiful smile? Can you guess where the dental implant is? Behind her beautiful smile is a journey that is one for the books! One of her front teeth was removed because of an infection that was caused by a root canal. In a search for a replacement tooth, her doctor gave her a list with 200 biological dentists contact information. The previous dentists that she chose told her she could not have a zirconia implant and high aesthetic restoration. She then found out about Beverly Hills BioDental & Facial Aesthetics. She was desperate and told the doctors that they were her last hope for a zirconia implant and beautiful restoration. Dr. Grace Goar Vershinina, together with her team digitally designed an implant surgery on CT Scan in front of her, confirmed that she can have a metal free zirconia implant and immediately ordered from Zeramex USA - The Cosmetic Implant."

...

bareleigh_running Maybe some of you didn't realize that I haven't had a front tooth since last October 🥺🦷. Last year, I started the journey of removing my infected root canal, front tooth and crown. When I was around 7 years old, a mountain bike 🚲 crash resulted in a chipped front tooth and a root canal done in 2 stages. I suspect it's been infected ever since, since I have had pain there all my life. 10 years ago, a dentist told me it needed to be removed before it resulted in systemic health problems, but I couldn't imagine being without a front tooth and didn't really understand how this could've caused problems at the time. Fast forward to now, when I have been diagnosed with an autoimmune disease. The fatigue, pain and aesthetic issues with my crown were enough to start the process of root canal, tooth/crown removal and getting a zirconia implant and crown. I had a really hard time finding a dentist to take my case because of my small face/bone structure (and it is my front tooth!) and an even harder time finding a holistic dentist who would do a zirconia (no metal) implant due to my sensitive health. I truly believe the universe stepped in when I found @beverlyhills_biodental. I've never met two more caring dentists than Dr. Grace and Dr. Greg. We have been on quite the journey together with all the steps for implant surgery and then when I saw my crown for the first time today, I immediately cried happy tears. I couldn't believe how the crown looked today when I saw it, and they nailed it on the first try! I literally can't even tell which one it is and it's my own teeth. I've never known what it's like to not have pain in my mouth and not feel sick or self conscious of my smile. I will be eternally grateful to these doctors. Their compassion and skill is unmatched and I'm so grateful for them. I'm also grateful for my husband for putting up with me being toothless 24/7 at home 😭 @scarbermike1. Kai also likes to tell everyone that I don't have a tooth. Well, I do now!! 🦷🥰🙏 I'm so grateful and happy. #zirconiaimplant #zirconiaimplants #holisticdentistry #holisticdentist #rootcanalremoval #toothrestoration

SMILE REVEAL

bareleigh_running Maybe some of you didn't realize that I haven't had a front tooth since last October 🙄💧. Last year, I started the journey of removing my infected root canal, front tooth and crown. When I was around 7 years old, a mountain bike 🚲 crash resulted in a chipped front tooth and a root canal done in 2 stages. I suspect it's been infected ever since, since I have had pain there all my life.

“I had a really hard time finding a holistic dentist who would do a **zirconia (no metal) implant** due to my sensitive health. I truly believe the universe stepped in when I found **Beverly Hills BioDental**. I've never met two more caring dentists than Dr. Grace and Dr. Greg.”

husband for putting up with me being toothless 24/7 at home 🙄 @scarbermike1. Kai also likes to tell everyone that I don't have a tooth. Well, I do now!! 🙄💧🙄 I'm so grateful and happy. #zirconiaimplant #zirconiaimplants #holisticdentistry #holisticdentist #rootcanalremoval #toothrestoration
